THIS IS HOW YOU TREAT ME RIGHT

Wash me at 40 degrees. Of course a higher temperature will not kill me.... but it will decrease my lifetime :(

Do not bleach me!!!

I dry best myself. Of course I understand that sometimes you need to dry me quickly.... from time to time you can throw me in the dryer, but remember that I can shrink :(

Honestly, it is a waste of time and money to iron me... Besides, iron can damage me :(

Do not dry clean.
- My goodness, that speaks for itself!!!

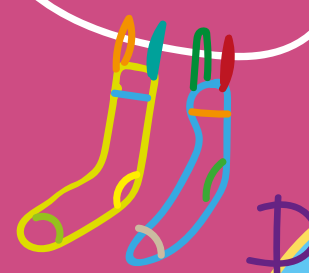

INFO AND TIPS

If you're not sure which sock size fits you best. This rule of thumb will help you: If you can wrap my footie around your own fist once and my toe and end are slightly touching, you've figured out my perfect lightweight fit on your foot and thus the right sock size.

"Trick"

I have found it, the perfect composition for a long-lasting connection between you and me! The ideal mix of cotton, polyamide and elastane ensures my super fit. Through this mixture I can, when you sweat the moisture to the outside and protect you from cooling.

Perfect Connection

Did you know ?

A certain amount of lint when worn several times is a sign of high quality. It indicates a high proportion of natural fibers.

If you want to make me out of 100% tiger cotton, wearing me will take some getting used to, as the stretch property of cotton will make you feel like I'm slipping on your foot. Also, as a pure cotton sock, I am not as durable and therefore less suitable as a everyday sock.

100% cotton Socks

Attention

I am not pre-washed, so I shrink after the first wash. But after that I fit perfectly on the foot and correspond to the actual size.
